**BLER**<sup>®</sup>  
CYBER & INTELLIGENCE

# INTRODUCTION

BLER develops innovative security and cyber intelligence solutions to identify threats and meet mission-critical operational needs. Our customers include enterprise organizations, financial institutions and government agencies worldwide. BLER solutions enable organizations to extract hidden insights from multimedia interactions and improve intelligence and business operations.

BLER WEBINT solutions include a complete suite of modular, enterprise-grade intelligence and investigation support applications integrated on a single platform. Our intelligence-driven, big data platform collects information from the widest range of sources and is purpose-built to provide visibility and control for system operators, analysts and investigators in the fight against terror threats and criminal activities.

# OUR SOLUTIONS

BLER WEBINT solutions accelerate intelligence and investigation activities through the synergy of technology, industry know-how and intelligence expertise.

## TARGET PROFILER

Generate highly accurate and reliable profiling data from multiple social networks and web applications.

## MARITIME INTELLIGENCE

Support the entire range of OSINT workflow monitoring traffic of vessels, containers and crew members.

## POINT OF INTEREST

Monitor online groups and perform target based profiling for all types of social activities on webint platforms.

## PUBLIC OPINION MONITOR

Collect data and analyze content from multiple types of social networks and media sources.

## GEO-TARGET MONITOR

Gather intelligence information for targets located in a specific geographical area anywhere in the world.

## DARKNET INTELLIGENCE

Uncover hidden information published by anonymous users on millions of concealed underground deep web sites.

# TARGET PROFILER

BLER Target Profiler identifies all types of phone-based data and social network activity information. With BLER Target Profiler, intelligence and investigation professionals can create target profiles to track online activities, identify social connections and criminal activities.

## Create Target Profiles

Generate an accurate target profile automatically based on known and unknown mobile devices.

## Track Activities on any Device

Prevent loss of critical intelligence information by tracking target activities on any device and a wide range of web applications.

## Identify Social Connections

Detect connections between targets and suspects based on known and unknown mobile phone numbers.

**“ IDENTIFY THOUSANDS OF KNOWN  
AND UNKNOWN PHONE NUMBERS  
...IN JUST A FEW MINUTES ”**

# SOLUTION ARCHITECTURE

The BLER Target Profiler architecture supports the complete OSINT work-flow cycle including collection, processing, analysis and reporting of OSINT web sources.

## FEATURE HIGHLIGHTS

BLER automatically generates accurate target profile data and enables investigators to focus on case investigation activities.

- » **Mass Profiling:** Build a personal profile from thousands of mobile numbers within minutes.
- » **Multiple Web Sources:** Collect information from a wide range of social networks and web applications.
- » **Profile Analytics:** Analyze a wide range of social activity including keyword spotting, posts timeline, geo-location and social network connections.
- » **Image Analytics:** Utilize accurate Face Recognition, Face Detection and Face Matching tools to identify targets on image based web sources.
- » **Avatar Management:** Manage multiple avatars and run BLER Crawler Robots to collect target data anonymously.

# MARITIME INTELLIGENCE

BLER Maritime Intelligence Module is a unified investigative desktop platform that enables intelligence professionals to monitor and analyze vessels, containers and crew members traffic and support the entire range of OSINT operational workflows.

Focused  
Crawler

Data  
Filtering

Diverse  
Sources

Alert  
Mechanism

Maritime Intelligence Module includes a full suite of purpose-built intelligence tools for inspection of vessels, cargo and people, to ensure security by threat detection and provide real-time alerts. System operators can gather a wide range of information and make an informed decision regarding entrance to the port according to security risk levels.

## FEATURE HIGHLIGHTS

### Continuous Monitoring

Detect and monitor vessels, containers and Human activities in the seaport area.

### Data Driven Analysis

Perform manual or automated processing of all collected data.

### Single, Unified Platform

Gain full coverage of seaport OSINT networks and sources for aggregated analysis of all data types.

### Built-in Intelligence Know-how

Utilize built-in intelligence workflows to support your operational needs.

### Threat Detection

Analyzing risk levels according to definitions and provide real-time alerts.

# LEVERAGE MARITIME SECURITY BY RISK ANALYSIS AND REAL-TIME ALERTS

Personal Info

Sentiment Analysis

Keyword & Pictures Spotting

Vessels-historical Traffic

Social Connections

# POINT OF INTEREST

The BLER Point of Interest solution generates intelligence about specific topics, events and targets. System operators can associate keywords related to a specific event or target and analyze behavior based on social media activities. The BLER Point of Interest solution supports the complete OSINT work-cycle, including data collection, processing, analysis and report generation.

## FEATURE HIGHLIGHTS

The BLER Point of Interest solution enables intelligence organizations to follow online groups and create “watchlists” to monitor and analyse the social activities of specific targets. The BLER Point of Interest application ensures operational effectiveness and efficient allocation of limited investigative resources.

- » Create topic and event based watchlists and target profiles.
- » Assign watchlist topics and events to suspicious targets.
- » Collect watchlist data from multiple social networks and web applications.
- » Generate real-time alerts based on watchlist activities.

# TRACK SOCIAL GROUPS AND TARGET ACTIVITIES

08:02:48

# ANALYZE INFLUENCE ON PUBLIC OPINION, PREDICT OUTCOME AND ACHIEVE MAXIMUM IMPACT

Macbook Pro

# GEO-TARGET MONITOR

The BLER Geo Target Monitor is a fully featured target location solution based on Open Source Intelligence Technology (OSINT). The BLER GTM solution enables system operators to analyse the social profiles of persons located in a specific geographical area. System operators can create multiple geo-monitoring entities, segment social profiles according to online activities, monitor and analyze target profiles based on any geographical area, worldwide.

Geo-Location  
Target Mapping

Smart Target  
Segmentation

Content  
Analytics

Face Recognition  
Analytics

Multiple Lookup  
Machine Sources

Worldwide  
Search Engine

# FAST ANALYSIS OF TARGET AUDIENCE LOCATED IN A SPECIFIC GEO-LOCATION.

## FEATURE HIGHLIGHTS

### Street Address

Collect information about persons located at a specific address or in a nearby area.

### Person Segmentation

Focus on specific traits such as age, gender, personal preferences or any other criteria.

### Link Analysis

Detect connections between all persons located within a specific geo-location.

### Face Analytics

Analyze profile photos to detect age, gender, ethnicity and other facial features.

### Global Geo-Search

Define automatic search criteria for any target located anywhere in the world.

### Data Import & Export

Transfer collected data easily to external intelligence and investigation applications.

# DARKNET INTELLIGENCE

Today, most criminal and terrorist activities are hidden from the “world-wide web” and exist underground in the depths of the Deep Web, also known as the Darknet. The collection and monitoring of information from Darknet sources creates unique challenges for intelligence professionals and requires specialized tools and techniques.

The BLER Darknet intelligence suite enables intelligence professionals to remain “undiscoverable” by Darknet targets and to uncover hidden information published by anonymous users on millions of concealed sites.

Terror  
Activities

Weapons  
and Guns

Drug  
Trafficking

Credit Card  
Fraud

# FEATURE HIGHLIGHTS

The BLER Darknet intelligence suite helps intelligence agencies and business organizations to identify and monitor targets, mitigate threats to public safety, and provide real-time information of suspicious behavior and target related activities.

## DARKNET DASHBOARD

Gain direct access to all Darknet system modules and utilities via an intuitive and easy to use interface.

## CRAWLER ROBOTS

Run advanced Crawler Robots on any standard browser to gather information from Darknet sources.

## AVATAR MECHANISM

Create an anonymous online identity to remain invisible and undiscoverable by Darknet targets.

## CASE MANAGEMENT

Create, and modify different types of cases and organise by category, case name, number or target.

## SEARCH ENGINE

Easy to use search interface enables users to run a search by category or by keyword with drill-down results.

## AUDIT TRAIL

Monitor all system operations including user login, case management and target tracking activities.

# PROFESSIONAL SERVICES

BLER professional services cover the complete project life cycle from initial planning and design, to development, quality assurance, installation, customer handover, maintenance and support. Our project implementation methodology ensures a smooth, rapid and predictable deployment effort on time and within budget.

Identify all operational needs, requirements and workflows. Design and implement a fully functional solution with built-in intelligence procedures and processes.

BLER engineers work on-site to ensure smooth integration and assimilation with no hassle and a predictable deployment effort for projects of all sizes and levels of complexity.

Get a wide range of role-based professional, training workshops and follow-on support services to ensure fault-free operation and full utilization of BLER solution features and workflows.

## EXPERIENCE & EXPERTISE

BLER system engineers have gained proven in-the-field knowledge of security-driven technologies and work processes based on the successful implementations of dozens of projects for major intelligence and security organizations worldwide. Our highly skilled team of experts bring multi-domain expertise and in-depth knowledge of traditional and open source intelligence platforms.

**“ OUR TEAM OF DEDICATED  
EXPERTS DELIVERS ON TIME,  
WITHIN BUDGET...AND NO  
HASSLE ”**

**“ POWERFUL INTELLIGENCE  
AND INVESTIGATION TOOLS  
BUILT FOR REAL WORLD  
SCENARIOS ”**

# OUR VALUE PROPOSITION

BLER WEBINT solutions deliver real-world operational benefits to Law Enforcement Agencies and intelligence organizations.

## Full Suite of Investigation Tools

Extract personal data from mobile devices and multiple webint sources.

## Any Type of Web Sources

Collect information from the widest range of web and Darkweb sources.

## Reduce Manual Operations

Deploy a fully automated intelligence system to free up time of investigators.

## Integrate with Existing Systems

Create seamless integration between any BLER solution and your existing intelligence infrastructure.

# CONTACT US

BLER develops innovative security and cyber intelligence solutions to meet a wide range of operational needs and security threats.
