

— Protecting our  
*Bespoke Lifestyles*  
Members from  
Physical Threats,  
Viruses & all  
Contagions'

---

How Bespoke will assure their members  
they will always remain safe & well  
protected while at sea or in Port...

Protecting Bespoke members from offshore Piracy, or onshore robbery and assault with the threat of terrorist assault and kidnapping...

Every superyacht in the Bespoke Lifestyles fleet will have at least one X-Special Forces “Warrior & Medic” onboard to deal with any potential crisis from Somali Pirates or other threats while offshore, as well as local con-artists and extortionists during visits to any of the foreign Ports of call that we frequent

# —Protecting our Members from Viruses, Contagions & serious accidents

- Communicable, or infectious diseases, are caused by microorganisms such as bacteria, viruses, parasites and fungi that can be spread, directly or indirectly from one person to another. Some are transmitted through bites from insects while others are caused by ingesting contaminated food or water & many directly from an infected individuals or compromised surface areas that can stay infected for weeks
- A variety of disease-producing bacteria and viruses brought onboard by guests can be treated by multiple disinfecting technologies employed entering vessels and any onboard issues will be treated with our full time X-Special Forces Medic & dedicated quarantine 'sick bay' onboard. Every vessel will be prepared for most any possible illness from MRSA to Zika, and all serious conditions will be medevacked via *Bespoke's* onboard 'T&G' helipad capabilities

Security and Safety are assured by having at least one **X-Special Forces Medic / Warrior** on every superyacht crew as the 'Chief Security Officer', capable to deal with any potential security crisis-situation/health emergency onboard or on shore; he can 'save a life or take a life'.

Our 'CSO' will be 'Special-Forces-battle-trained' and fully equipped to deal with any emergency from a heart attack to a wound requiring stitches. Every superyacht will have a room that can be immediately converted to onboard 'sick bay' with isolation for infectious disease issues and monitoring equipment to assure lifesaving.

All crew will be required to pass the ServSafe® food preparation & serving allergy exam for both food & beverage and they will be schooled through the *Four Seasons Luxury Service Training Program*. Crew will be trained to inject epinephrine to deal with anaphylactic shock, in saltwater lifeguarding & they will all be trained at the highest level as career crew professionals.

Bespoke's helipad capacity on every vessel will provide the crew airlift capabilities for seriously ill passengers to always be medivacked to the closest medical facility.

# Consistent 24/7 Security ~ Offshore and in Port...

# Utilizing Portable UVC Disinfecting Germicidal Lamps to sanitize with Ozone...

---

- This lamp is available in a hand-wand for rapid personal sterilization and disinfection. This light also produces ozone. Ozone can sterilize places ultraviolet light can't reach. This advanced UVC technology disinfects as well as, sterilizes, and can also remove most harmful odors onboard.
- Ultraviolet (UV-C) light will help to eliminate 99% bacteria, viruses, fungus, molds, etc. on clothes and the surfaces of most personal items. It also remove odors, bacteria, and dust motes which cause splenitis, pneumonia, asthma, and many allergies.
- This technology can be used to “wand down” guests & crew as they board ship. There are three different UV light wavelength categories: UVA, UVB and UVC. This lamp produces UVC, the only wavelength known to be germicidal and is highly portable.

# — Emergency Surgery Capabilities with full Lifesaving Equipment Onboard Every Superyacht

The vessel's Chief Security Officer will also serve as Emergency Medical Officer; with his experience in combat situations he will have the capability of converting either the massage room or other dedicated space into immediate 'Emergency Operations Room' status for surgery, quarantine, or general 'sick bay'..

---

Those health emergencies that can't wait to be medivacked will have the life-saving equipment available from surgical and IV equipment to advanced AED (Automatic external defibrillator) for cardiac arrest members/guests. A controlled amount of basic emergency room medical equipment with a trained medical professional will assure safety for members & crew.

# Superyacht Onboard Protocol

Only bare feet will enter the superyacht...with all shoes left on either the helipad, passerelle or at the gangway entrance. The crew will disinfect all foot ware, jackets and luggage before it is allowed into the superyacht's 'sanitized inner sanctum' of the member and crew living area...

Once onboard the superyacht our members & guests are assured complete safety and security from those physical or biological threats that may attempt to gain access to the superyacht.

A group of people are enjoying a boat ride at sunset. In the foreground, a woman with blonde hair and sunglasses is smiling. Behind her, a man in a white shirt and dark vest is pouring champagne into a glass held by another woman with blonde hair and sunglasses. The background shows a sunset over water with trees on the shore. The text is overlaid on the left side of the image.

With the proper precautions and a well-trained crew our UHNWI members will continue to enjoy their *Bespoke Lifestyles* membership while staying safe from all of those real dangers that do exist...
