The NewMan Divine Savior and The Innovation, Economic and Financial New Model of World Projects

For the sake of maritime and land assets, borders and national and international security, the implementation of fast and sustainable maritime and maritime, ground and air operations is based on economic, financial, technical smuggling, kidnappers, drug users, smuggling, the smuggling of illegal weapons, the smuggling of illegal weapons, firefighting equipment, and the prevention and prosecution of all criminal asset and illegal activities within and outside the borders.

III.2.4; National and international fraud in IT and Bank financial systems should be treated as a priority area. This should be a priority area. One of the most important tasks of the future is the abuses of these areas, the corruption and appearance of economic and financial transactions and detection.

III.2.5; It must be treated as an outstanding task; cooperation with the population through the help of the European Auxiliary Police Association Central Head Office. There must be close links between government forces, including private security groups, private and government investigators, security guards, private individuals, private bodies, councils, concepts, systems, policies of the contract countries, the presidential bodyguard, the VIP Defense Forces in the country and and abroad, alike.
