To Whom It May Concern:

The ³BeMotion Inc² Non-contact Temperature Screening System set up in the lobby of the Tenafly New Jersey Borough Hall has been working great. Although the municipal complex is operating in a limited capacity, anyone who enters the building for scheduled appointments is being successfully screened. Additionally, all Borough employees must be screened by the device when they arrive at work, when they leave and return from lunch, and as they pass through the lobby during their work day. The receptionists who monitor the system at the front desk all reported having no problems with the screenings and that it's easy to set up and operate. I look forward to the opportunity to utilize the portable function of the screening device and deploy it at large outdoor gatherings and events once they're permitted to resume.

A side benefit to the actual screening process is that the system serves to allay some of the fears some employees have about returning to the work environment and interacting with members of the public during this ongoing health crisis.

I would recommend this product and system to any government office or business to properly temperature-screen members of the public and employees who enter and move through the facility each day.

Respectfully,

A handwritten signature in blue ink that reads "Chief Robert Chamberlain".
