

Protect 28 and 30 Test Results Letter

29Th July, 2020

Dear Sir,

This letter is to communicate the results of recent testing performed by Emirates Specialized Laboratory (ESL) for Protect-28 and 30 a said anti-microbial agent was tested in our laboratory with due protocol observed.

Protect 28 and 30 have been found to exhibit anti-fungi, anti-bacteria and anti-viral properties. It has been found to be effective on surfaces applied for more than 14 days. It is not alcoholic based making it a good anti-microbial agent for people with alcohol sensitive skin. It is very mild on the skin and it is well tolerated by children even new born.

It is far better than the traditional alcoholic sanitizer in protection against covid-19.

I would recommend it for Emirates, UAE Residents, tourists, schools, factories, markets, mosque, offices, and hospital. It can be used by everyone irrespective of age. I will recommend it to the UAE government because it meets all the requirement stipulated by Dubai Health Authority (DHA) and it will be embraced by people of UAE Residents. It is also an environment friendly product that does not disrupt the existing ecosystem through its breakdown.

We greatly appreciate your support as we help all our residents through this difficult time.

Sincerely,

مع تـ واصل Eman Alzard

Medical Laboratory Scientist
