PROPOSAL TO EMIRATES AIRLINES

Make your travellers safe again
with the world's best anti-viral
technology

COMPLIANCE CERTIFICATIONS

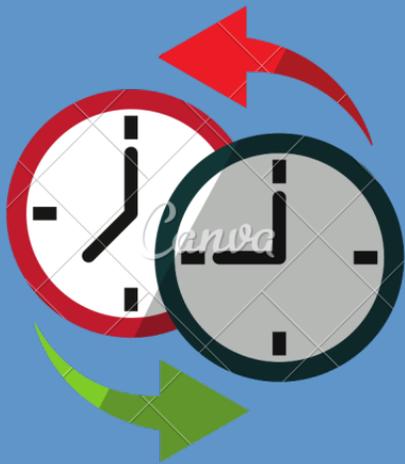

PHOTOSENSITIZING

Backed by Science

24/7 all round protection from new germs!

Forms a thin and invisible layer of protection, killing new virus from forming on the protected surfaces...

How G3Tech technology works

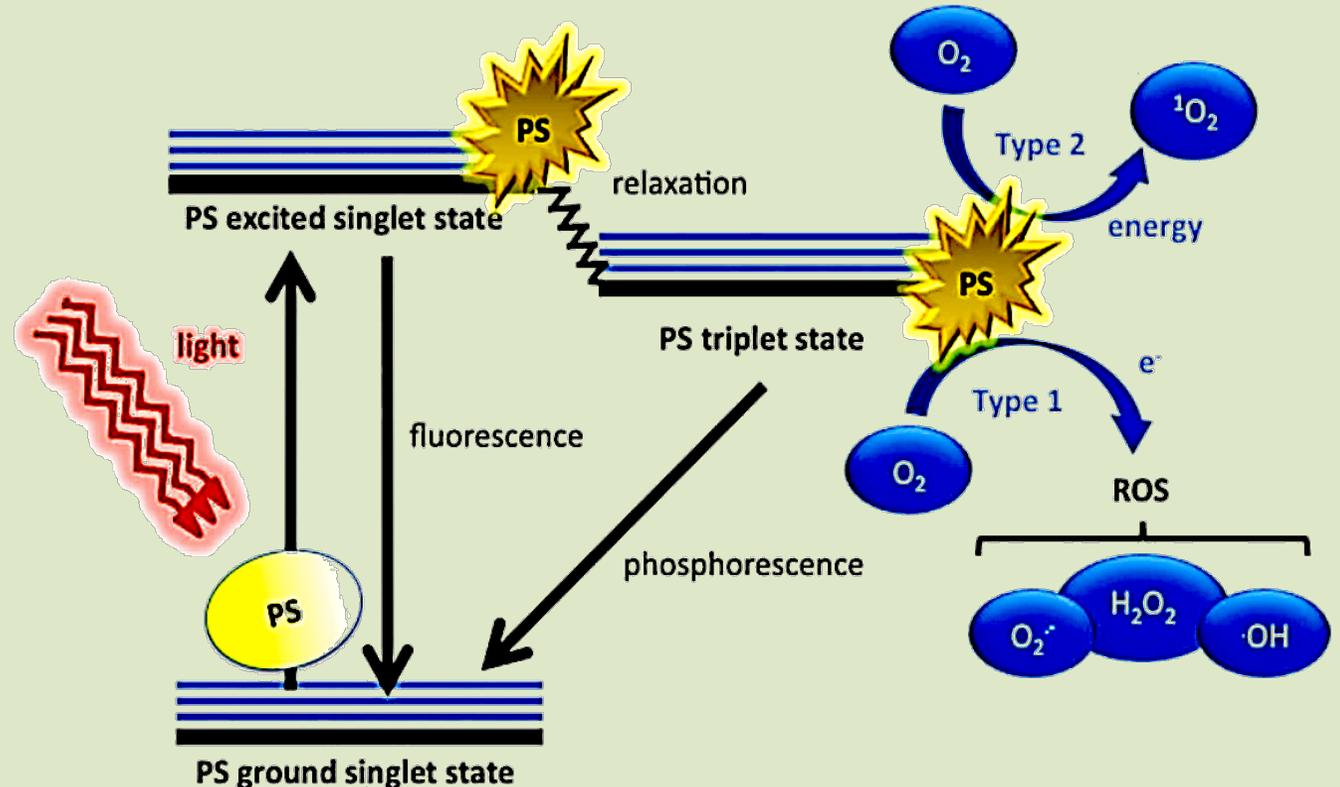

Our technology is a photosensitiser (PS) that is able to kill 99.9999% of bacteria and viruses on contact.

The PS does not contain toxicity and does not use toxicity to kill germs. Instead, it uses short and rapid bursts of Oxygen (O_2) to effectively kill viruses and bacteria, leaving the microbes with absolutely no chance of survival.

When light (any type, including natural/indoor) is present, our PS will trigger a reaction with molecular oxygen. The process converts into energy and excited singlet state oxygen which will destroy the microbes.

Due to the dual mechanism in our technology, our PS works without light too.

- ✧ Safe
- ✧ Chemical-free
- ✧ Affordable
- ✧ Long-lasting
- ✧ Instant kill

Coronavirus

BEFORE OR DURING a flight

- Do not fly if you have a fever, cough, cold, difficulty breathing or flu-like symptoms.
- Share your travel history with your health care provider.
- Food safety**
Avoid eating raw or undercooked animal products (meat, milk, etc.)
Wash your hands every time you handle food.

Protect Yourself and Others from illness while flying – reduce the risk

- Clean hands frequently and well with alcohol based hand rub or soap and water.
- If you feel ill while travelling, before take-off and seek medical care ASAP.
- Avoid close contact with others who have a fever, cough, cold, difficulty breathing or flu-like symptoms.
- When coughing and sneezing, cover mouth and nose with front elbow or tissue – dispose of tissue immediately and wash hands.
- Avoid touching eyes, nose or mouth.

IF A PASSENGER... is confirmed ill the crew should:

- Use the health part of the aircraft manual and contact the health information on board and report it to the local authority when required by a local representative.
- Ask passengers to complete passenger locator card forms to identify where to find you. The passenger is seated along with immediate neighbours to facilitate contact with you and contact others.
- Recommend to passengers to self-report if feeling ill as described above.

IF A PASSENGER... shows signs of being ill

- Make use of protective equipment (gloves and masks) and avoid contact with passengers who have a fever, cough, cold, difficulty breathing, or flu-like symptoms.
- Wear gloves when handling items such as food containers, glasses and food trays.
- Use the health part of the aircraft manual and contact the health information on board and report it to the local authority when required by a local representative.
- Recommend to passengers to self-report if feeling ill as described above.

IF A PASSENGER... is confirmed ill the crew should:

- Use the health part of the aircraft manual and contact the health information on board and report it to the local authority when required by a local representative.
- Ask passengers to complete passenger locator card forms to identify where to find you. The passenger is seated along with immediate neighbours to facilitate contact with you and contact others.
- Recommend to passengers to self-report if feeling ill as described above.

G3Tech antiviral Filter
Types of aviation filters

Buildings, Lifts, Vehicles

G3Tech antiviral Filter
Types of aircon. Ventilator filters

UNITED

A STAR ALLIANCE MEMBER

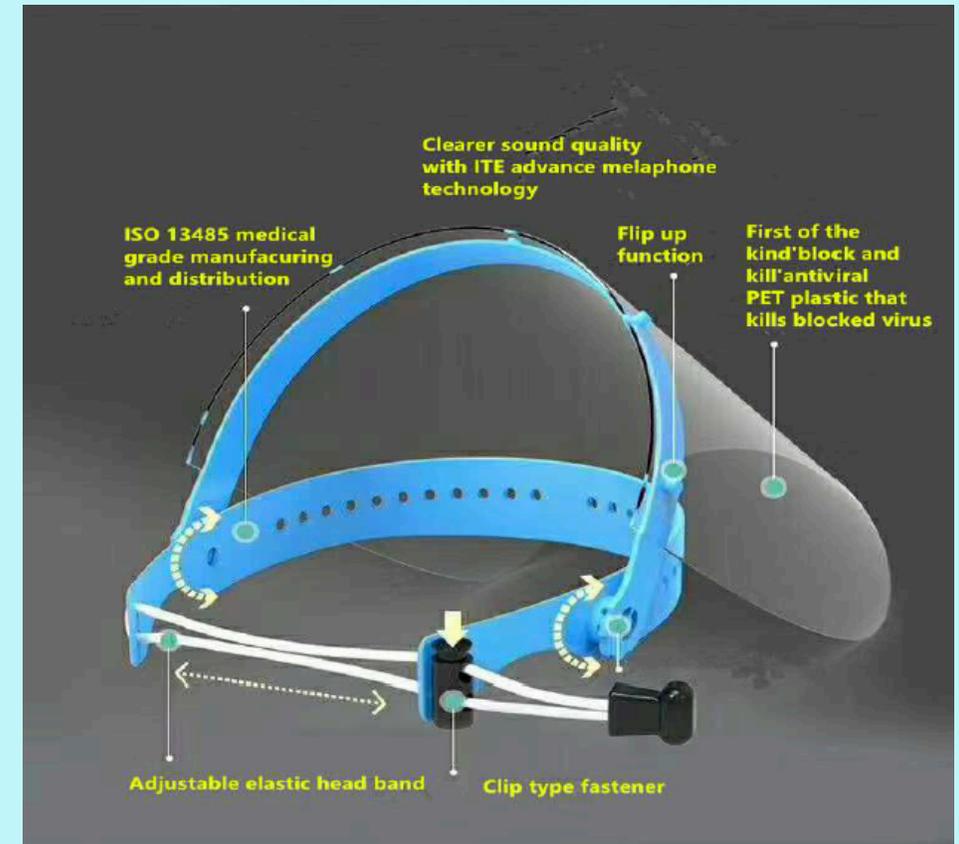

UNITED

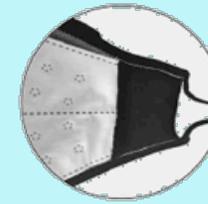

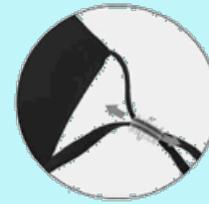

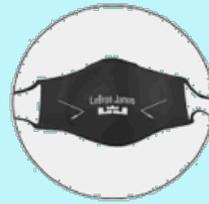

Antiviral self-sterilizing transparent film plastic and PET

Wrapping make mandatory for exports due to covid -19 virus found in products wrapper

A unique and complete mask

01

“3D” Digitally knitted.
Individually customisable

02

Antiviral fabric

03

Flexible and
Ergonomic design

04

Filter that blocks
and kills 99%
of viruses

05

Comfortable and
highly breathable

1

Medical grade

Tested and used in hospital and childcare in Japan, China and Singapore

2

Stop communicable disease transmission

Only known solution that stop disease transmission from point surface

3

Removal of odour

Stopping microbes growth enable removal of odour and degradation of gas pollutant. Hence enable clean air purification

4

Bacteria KILLING not Suppression

Suppression enables microbe growth and has no efficacy in early hours as claimed. KILLING eliminate by KILLING microbes, hence stopping disease from transmitted on contact. 🇫🇷

DISCLAIMER

This presentation is issued by Enviroglobe Teknologies. It is solely for general information purposes and for the recipient's sole use and shall not be further transmitted to third parties. You have been provided with this presentation in your capacity as an interested party, investor, originator, sponsor, issuer or simply as an introduction to Enviroglobe Teknologies. This presentation is not a prospectus and the information contained herein does not constitute an offer or an invitation to enter into any type of financial transaction, nor an act of distribution, a solicitation or an offer to sell or buy any investment product in any jurisdiction in which such distribution, offer or solicitation may not be lawfully made.

This presentation may contain forward-looking statements. Words such as 'expects', 'anticipates', 'intends', 'believes' or the negative of these terms and other similar expressions of future performance or results, including any financial objectives, and their negatives are intended to identify such forward-looking statements. These forward-looking statements are based upon current expectations and assumptions regarding anticipated developments and other factors affecting Enviroglobe Teknologies. They are not historical facts, nor are they guarantees of future performance. Because these forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including, among others, competitive pricing and activities, consumption levels, costs, the ability to maintain and manage key customer relationships and supply chain sources, currency values, interest rates, the ability to integrate acquisitions and complete planned divestitures, the ability to complete planned restructuring activities, physical risks, environmental risks, the ability to manage regulatory, tax and legal matters and resolve pending matters within current estimates, legislative, fiscal and regulatory developments, political, economic and social conditions in the geographic markets where Enviroglobe Teknologies operates. These forward-looking statements speak only as of the date of this presentation.

Enviroglobe Teknologies does not make any representation, whether express or implied, as to the accuracy or completeness of this presentation and assumes no liability for losses arising from the use hereof. Before entering into any transaction, an investor should determine if a product suits its particular circumstances and should independently assess (with its professional advisors) the specific risks (maximum loss, currency risks, etc.) and the legal, regulatory, credit, tax and accounting consequences. Enviroglobe Teknologies makes no representation as to the suitability of any investment product for any particular investor nor as to the future performance of any investment product.
